EXECUTIVE SUMMARY

Backend Engineer with 5+ years constructing high-throughput APIs, gRPC services, and event-driven systems using Node.js (NestJS, Express) and Go. Specialized in asynchronous message brokers, domain-driven design, Redis caching patterns, and database sharding.

CORE COMPETENCIES

Node.js (NestJS, Express) | Go (Golang, Gin) | gRPC & Protocol Buffers | PostgreSQL & MongoDB | Redis Distributed Locks | RabbitMQ & Apache Kafka | Docker & Kubernetes | Elasticsearch | GraphQL & REST | Unit Testing (Jest, Testify)

EXPERIENCE

Senior Backend Developer • **TCS Interactive** — Sep 2021 – Present | Chennai / Trichy

- Constructed a decoupled order-fulfillment service using Go and gRPC processing 4,000 requests/sec with p99 latency <18ms.
- Architected distributed Redis-backed rate limiters preventing abuse across public payment gateway interfaces.
- Integrated RabbitMQ message dead-letter exchanges and retry queues to achieve zero transactional event loss.

Backend Software Engineer • **Kumaran Systems** — Jun 2019 – Aug 2021 | Chennai

- Migrated legacy PHP services to TypeScript NestJS microservices, achieving an 8× gain in transaction throughput.
- Implemented full-text search engine utilizing Elasticsearch for 3M+ dynamic product catalogs.
- Engineered database migration pipelines and connection pooling routines across PostgreSQL instances.

KEY PROJECTS

Distributed Lock & Job Scheduler Engine Go • Redis • Docker
Built a fault-tolerant cron scheduler capable of leader election and distributed mutex execution across a cluster of 10 nodes.

High-Scale Notification Dispatcher NestJS • Kafka • WebSockets
Engineered an omnichannel notification aggregator routing SMS, email, and mobile push notifications for 1.8M registered subscribers.

EDUCATION & CERTIFICATION

B.Tech Information Technology • National Institute of Technology (NIT), Tiruchirappalli — 2015 – 2019 • CGPA: 8.9/10
