EXECUTIVE SUMMARY

Enterprise Java Software Engineer with 6+ years specializing in core Java (8/17/21), Spring Boot microservices, multithreading, and distributed transactional banking architectures. Proven record optimizing low-latency payment processing engines and legacy monolith modernization.

TECHNICAL COMPETENCIES

Core & Back-End:	Java 17/21, Spring Boot, Spring Cloud, Spring Security, Hibernate, JPA
Messaging & Caching:	Apache Kafka, RabbitMQ, Redis, Hazelcast
Databases & Tools:	Oracle DB, PostgreSQL, Maven, Gradle, Docker, Kubernetes, Jenkins, Git

WORK EXPERIENCE

Technical Specialist - Java • **Cognizant Technology Solutions** — Jan 2021 – Present | Chennai / Madurai

- Designed high-resilience payment gateway modules complying with PCI-DSS handling 3,500+ TPS.
- Migrated monolithic Spring MVC banking modules into 12 cloud-native Spring Boot microservices.
- Implemented resilience patterns using Resilience4j (Circuit Breaker, Rate Limiter) preventing cascading failures.
- Tuned JVM garbage collection parameters (G1GC, ZGC) reducing stop-the-world pauses by 65%.

Java Software Engineer • **HCL Technologies** — Jun 2018 – Dec 2020 | Madurai

- Engineered RESTful backends and SOAP adapter integration layers using Spring Boot and Hibernate.
- Wrote automated integration test suites using JUnit 5, Mockito, and Testcontainers.
- Resolved critical production memory leaks using Eclipse Memory Analyzer (MAT) and VisualVM profiling.

ENTERPRISE PROJECTS

Automated Clearing House (ACH) Settlement Core
Engineered batch reconciliation processor reconciling 1.2M daily merchant ledger transfers with zero financial drift.

Real-Time Fraud Detection Pipeline
Constructed an event-driven Kafka Streams scoring engine evaluating transaction risk parameters under 35 milliseconds.

EDUCATION & CREDENTIALS

B.E. Computer Science • Thiagarajar College of Engineering, Madurai

Oracle Certified Professional: Java SE 11 Developer (OCP)
